

Using your imagination and creative thinking skills you are going to create an extra month in the calendar year. Your task is to create a leaflet with information about your month.

Think about the following information when creating your new month:

What makes your month so special? Does it relate to or is it named after a festivity, mythical character or God, a hero, planet or seasonal feast?

You will need to include:

- A cover page – design and draw a symbol for your month and give it a name.
- A detailed explanation about your month including the following:
 - a) why you have chosen the name and its original source including any real, mythical, fictitious or historical facts.
 - b) The part of the year the month appears *e.g. would it appear between certain months and if so what are the reasons for this?*
 - c) Whether it is a permanent part of the calendar or whether it appears within a period of years *e.g. leap year*.
- An illustrated calendar page for your chosen month showing the special days and events which occur within it. Describe the importance of these special events.
